Summary

Computer Science undergraduate with hands-on experience in full-stack development and building real-world web applications. Skilled in developing user-focused and efficient software solutions with an emphasis on clean design and problem solving.

Education

2023 - 2027 **B.Tech, Computer Science & Engineering**

Maharaja Agrasen Institute of Technology, Delhi

Trainings / Certifications

– Oracle AI Foundations Associate

– Full Stack Web Development Bootcamp – Udemy

Technical Skills

Languages: C, C++, Java, Python, JavaScript, HTML, CSS

Libraries/Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, Redux/Zustand

Databases: MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, VS Code, Postman/ThunderClient, Appwrite, Docker, AWS, Linux

Projects

• **SnapBuy – Multi-Vendor Ecommerce Platform** | [GitHub](#) | [Live Demo](#)

Developed a production-style full-stack ecommerce platform using React, FastAPI, MongoDB, Razorpay, and Cloudinary.

- Implemented secure authentication with JWT, HTTP-only cookies, and role-based access for customers and merchants.
- Built complete ecommerce workflows including product management, search and category-based filtering, dashboard features, role-based user workflows and features, checkout, and order tracking.

• **Blogify – Full-Stack Blogging Platform** | [GitHub](#) | [Live Demo](#)

Developed a full-stack blogging web application using React, Tailwind CSS, and Appwrite, enabling users to create, publish, and interact with blogs.

- Implemented role-based authentication and protected routes.
- Integrated blog & comment CRUD with markdown editor and image upload.

• **Task Management App** | [GitHub](#) | [Live Demo](#)

Developed a full-stack task management web app using React, Node.js, Express, and MongoDB.

- Implemented user authentication, CRUD operations, task categorization, analytics dashboard, and calendar integration.
- Added search, sort, and filter features for improved task organization.

Achievements

- Top 30 out of 700+ teams at GGSIPU Vibestate Hackathon (2025) reached semi-finals for building MindMateAI app.
- Reached the semi-finals in ET GenAI Hackathon 2026 with ETNewsSphere (Multi AI-Agent-Based Project) and was recognized among the top-performing candidates.
- Solved 200+ Data Structures & Algorithms problems on LeetCode and GeekForGeeks.
